200% Build Volume Increase (compared with Foto 6.0)

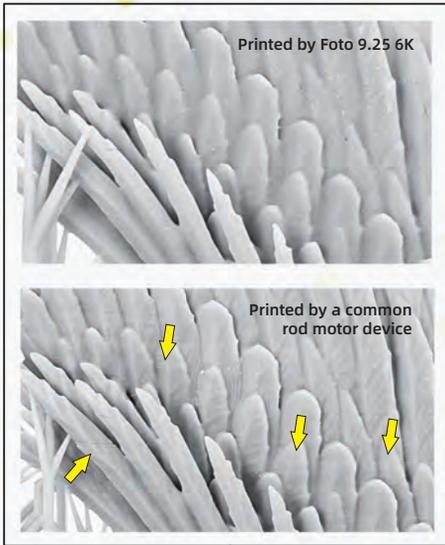

138%

138% Screen Size Upgrade (compared with Foto 6.0)

The build volume is increased and the screen size is expanded.

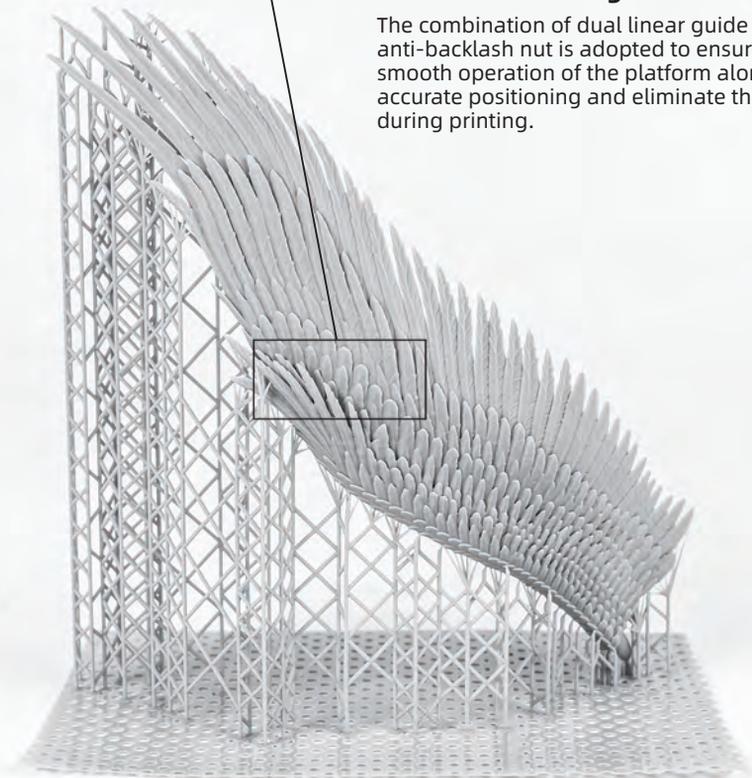

Foto 9.25 6K possesses a forming size of 197*122*200mm, that is, a total build volume of 4.8 liters. This is a 200% increase over the 1.6 liter build volume of the Foto 6.0.

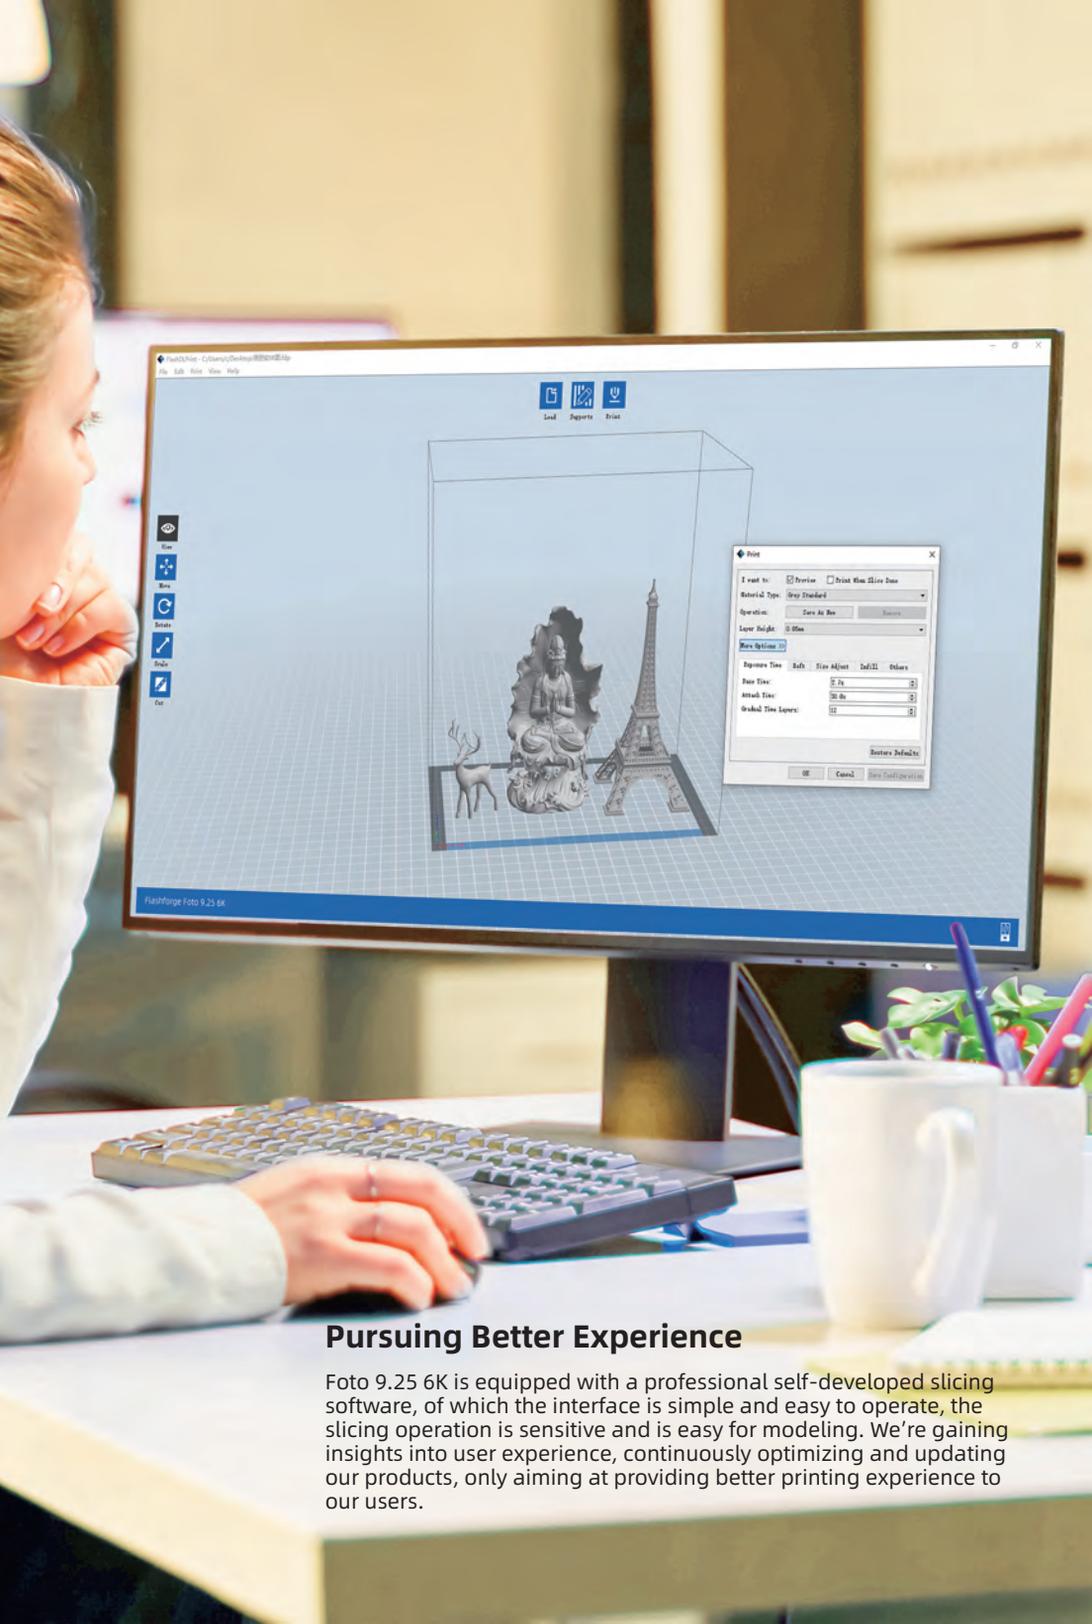

Pursuing More Stable Operation

The combination of dual linear guide rail, rod motor and anti-backlash nut is adopted to ensure the stable and smooth operation of the platform along the Z-axis with accurate positioning and eliminate the layer lines caused during printing.

Pursuing Better Experience

Foto 9.25 6K is equipped with a professional self-developed slicing software, of which the interface is simple and easy to operate, the slicing operation is sensitive and is easy for modeling. We're gaining insights into user experience, continuously optimizing and updating our products, only aiming at providing better printing experience to our users.

Foto 9.25 6K Equipment Parameters

Printing Speed	10-50 mm/H
Build Volume	197*122*200 mm
Layer Thickness	0.025-0.2 mm (Adjustable)
XY Resolution	0.05 mm
Wavelength	405 nm
Z-Axis	Industrial dual linear guide rail
Projection Screen	9.25-inch industrial 6K monochrome screen
Build Plate	Sandblasting platform (increase the adhesion)
Vat Capacity	0.5L
Connectivity	USB / Ethernet
Power	120W
Equipment Size	280*240*465mm
Display Screen	3.5-inch touch screen
User Experience	Easily-replaceable LCD screen
