

MIDLAND[®] ER300 PRO

Freedom without blackouts

Wherever adventure takes you, the ER300 PRO Bluetooth Emergency Radio is your ultimate survival tool: ultra-bright SOS flashlight, powerful speaker, Bluetooth connectivity, and charging via solar panel or dynamo. The 10,000 mAh battery provides up to two full charges for your smartphone.

EMERGENCY LINE

ER300 PRO

Midland ER300 PRO is much more than a power bank: it's a portable emergency hub designed to give you autonomy, safety, and even a touch of entertainment when you need it most.

With a powerful 10,000 mAh battery, it can recharge your smartphone even when you have no access to the power grid, making it essential for camping, hiking, and everyday emergencies (both outdoors and at home) such as power drops or blackouts – or simply for traveling safely.

Key Points

- **Super 10,000 mAh battery** – Up to 4 times more durable than the ER100, ideal for fully charging a smartphone in about 3 hours.
- **Always operational, anywhere** – Three charging modes: USB-C, manual dynamo, and solar panel (useful for maintaining charge).
- **Dual SOS alarm** – Visual and now also acoustic, for even more effective emergency alerts.
- **Built-in entertainment** – Bluetooth function and high-performance speaker to enjoy music from your phone.
- **Integrated temperature sensor** – Displays in Celsius and Fahrenheit to monitor surrounding conditions.
- **Perfect for outdoor & emergency use** – The ideal companion for trekking, camping, RV trips, or a home emergency kit.
- **Powerful 130-lumen CREE® LED flashlight.**
- **Ultrasound recall for rescue dogs.**
- **AM/FM radio.**

EMERGENCY LINE

ER300 PRO

More than a power bank: a complete ally for every adventure

Three charging modes — USB-C, hand crank, and solar panel — ensure you always have power available. But the ER300 PRO goes even further: it includes Bluetooth connectivity, turning it into a portable speaker to give you moments of entertainment wherever you are.

The built-in temperature sensor and the dual SOS alarm (visual and acoustic) make it a complete, reliable, and ready-for-anything tool. Compared to the ER300 model, the PRO version offers a battery with four times the capacity, additional features, and significantly greater autonomy — a true evolution in the name of freedom.

Technical features

- High-performance Bluetooth speaker
- Temperature sensor and display
- Power bank function with high-efficiency 10,000 mAh Li-Ion battery (up to 100 hours of normal use)
- Ultrasound function for dogs (useful for search and rescue teams)
- Powerful 130-lumen CREE® LED flashlight
- SOS Morse code signal via light and acoustic alarm
- Digital clock
- AM/FM radio with telescopic antenna for FM reception
- Audio output for external speaker or earphones
- Shock-resistant design
- Backlit LCD display
- 3 charging modes: USB-C (IN/OUT), hand crank, solar panel (useful for maintaining charge in emergency conditions)
