

# SureColor SC-P7500 Spectro

DATASHEET / BROCHURE

This large format printer (24-inch) offers exceptional quality and versatility across many applications.

This is Epson's first 12-colour large-format printer and offers a wide colour gamut with 99% Pantone coverage<sup>1</sup>. The SureColor SC-P7500 (24-inch) has been developed for artists and photographers, as it offers reliable reproduction for professional proofing and a rapid throughput for high-volume production.

## High quality with 12-colour inkset

Epson's UltraChrome Pro12 inkset, with K3 technology, outputs both black inks simultaneously, and includes orange, green and violet, which provides the user with impressive colour accuracy. The SC-P7500 is great for professional photographers and fine art production, and those who demand the highest print quality to make their art more marketable to the discerning buyer.

## Designed for business productivity

The SC-P7500 (24-inch) combines high-speed production with quality, thanks to the  $\mu$ TFP12 printhead with 300dpi resolution and 12 channels. Users will further benefit from the sealed main unit that provides dust protection, and the ink sub-tanks that provide continuous printing, even if ink levels are low.

## Precision matters

With Epson colour measurement, checking and correction technologies, packaging and contract proofers can now work with more efficiency and greater confidence.

## Easy and intuitive handling

Users will benefit from a highly-intuitive 4.3-inch LCD touchscreen (with a user-friendly interface), internal illumination to watch print progress easily, and large status LED to easily check from a distance. Also, everything is designed to work in harmony as Epson offers the complete solution – printer, inks, substrates, software and support.
