iSteadyPro4 How to connect GoPro?

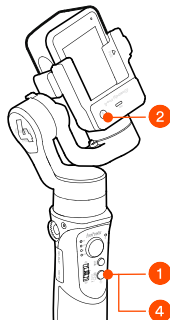

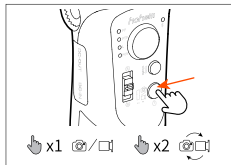

01 | Press and hold the power button for 3 seconds to turn on the gimbal.

02 | Double-click the PAIR button to enter camera pairing mode and camera connection indicator keeps flashing green.

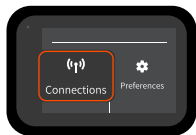

04 | GoPro can be controlled by the gimbal once the camera connection indicator stays on green.

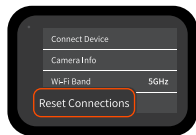

03 | Connect with GoPro (e.g. GoPro 10)

► Unpair the camera: Press and hold the gimbal's PAIR button for 3 seconds, the camera connection indicator will fast flash green 3 times and turn off (if you want to change a camera to connect).

(1) Select 'Connections'

(2) Select 'Reset Connections' - 'Reset'

* (3) Select 'Wireless Connections' - 'On' - 'Connect'

* (4) Select 'GoPro Quik App' and wait for connection

*Wireless connections vary slightly depending on the different GoPro models. E.g. GoPro 5: * (3) Connect New Device -

* (4) Capture App; GoPro 8: * (3) Wireless Connection - * (4) GoPro App.
