

Clean messes up to 40% better with HydroSteam™ Technology

Only BISSELL® offers the cleaning power of HydroSteam™ Technology to remove the toughest stuck-on and sticky messes. Clean 15X deeper than a stick vacuum alone and remove dirt & grime that a vacuum leaves behind*.

PowerWash HydroSteam™ provides two cleaning modes to meet your mess needs. Clean up to 40% better with HydroSteam™ Technology. Steam Pretreat Mode penetrates and loosens stuck-on, stubborn stains and SteamWash™ Max Mode cleans carpets with steam, water, formula. The XL DirtLifter® PowerBrush and powerful suction, combined with BISSELL Wash & Protect Pro formula loosen, lift and remove embedded dirt and stains in your carpets and area rugs. Tackle larger spaces with fewer trips to the sink with the large 3.8L clean tank. The 2.1m hose and 10cm self-cleaning tough stain tool can be attached to clean upholstery, stairs, pet beds, and more.

PowerWash HydroSteam™ also features an easy to clean 1-piece removable nozzle and brush roll cover with our Catch & Clean Tray, which is designed to catch embedded debris from carpets and prevent build-up in your machine.

*vs BISSELL Stick Vacuum Model: 4094N
