USER'S MANUAL

Dear Customer,  
the Neno Frutta product you have purchased is a teether for serving fruit to babies. Please read the instructions before using the device.

#### 01. PRODUCT FEATURES

##### 100% SAFE

Baby Fruit Feeder Pacifier is made entirely of silicone. It is BPA FREE. Baby fruit feeders allow your baby to gum on solids long before teeth come in. Best of all, you don't have to worry about your baby putting choke-sized chunks of food into mouth.

##### 100% MULTI-FUNCTIONAL

Baby fruit feeders combine the functionality of a pacifier and teether. To use it as a feeder, simply pop some fruit or vegetables, breast milk, or puree into the nipple. Great for teething babies. Textured surfaces that massage and stimulate gums are perfect for assisting the eruption of front, middle, and back teeth.

##### PROTECTIVE CAP & BONUS PACIFIER CLIP

Our baby food feeders come with a protective cap. Not only does this cap keep the silicone tip clean and hygienic, but also stops you covering your hands with baby food while you fill the food reservoir. Once you have filled the food reservoir to capacity, you simply lock the handle into position and give it to your baby.

#### EASY CLEANING & STORAGE

Silicone nipples are super simple to clean. A light scrub under warm soapy water is all it takes to wash the remainder of your baby's meal out. Each has a removable lid to contain messes. The nipple is made of silicone and the handle is made of plastic. Its large, circular handle is easy for babies to grasp. These fresh food feeders are easy to clean — just sterilize them in boiling water.

#### 02. CLEANING

1. Please clean and disinfect before the first use; After each use, rinse immediately, drain and store in a cool and dry place.
2. Please put in boiling water disinfection for about three minutes, a long time boiling disinfection may cause deformation.
3. Do not clean with corrosive chemicals.

#### 03. WARNING

1. This product should be used under adult supervision.
2. Keep away from fire and avoid direct sunlight.
3. Do not use a sharp cleaning brush to clean the product, so as not to damage the product.
4. Please check the product before each use, and replace it in time if any damage occurs.
5. The silicone pouch may adsorb food pigments and change color, but it will not affect use.

#### 04. SPECIFICATION
