

EASY APP® SMART PRO

We are improving the application PROcess!

This solution minimizes the risk of errors while reducing application time, significantly increasing the overall efficiency of the process. Additionally, the built-in pressure roller further accelerates the application compared to the EASY APP® SMART system.

The device allows the application of materials in both dry and wet application.

4 point positioning technology

pressure roller

10 seconds to quickly apply the film

easy to apply film

application of dry and wet materials

POWER INTERFACE: TYPE-C OR AA BATTERY

POWER SUPPLY: DC 5V=1A

MATERIAL: PC+ABS

SIZE: 300X190X115MM

KEY TYPE: TOUCH THE BUTTON FOR 2S

Compatible with 99% Models

Works with 99% of all mobile phone models on the market.

Pressure roller

A pressure roller integrated into the device ensures even and precise pressure across the entire surface.
